Introduction

A self-taught and entrepreneurial Front End developer based in Cairo - Egypt.

I believe the web should be open for everyone, so my main focus and passion is to create faster, functional, and accessible products to make an impact in people's lives.

Skills & Technologies

HTML5, Sass, ITCSS, JavaScript, Responsive Design, Accessibility, Gulp, Deployment, Git, GitHub, Rails, Jekyll, Ghost, WordPress, Command Line, Handlebars, Technical Writing.

Personal Projects

Okto.io - Arabic Blogging Platform

I created to solve a personal problem for not finding a simple and functional platform for writing in Arabic.

Helped thousands of people write and read in Arabic with a simple and elegant UI. Built with Rails, HamL, Sass, Docker, Dokku, and deployed to DigitalOcean.

Technical Writing

With a passion for sharing what I know with others, I write about Front End development at SitePoint and also on Medium.

Experience

Aspire Themes – Founder & Developer
(2015 - Present)

At aspirethemes.com I design and develop high quality WordPress, Ghost and Jekyll themes.

Trustious – Front End Developer
(2015)

Worked with the engineering team in a data driven application and also designed and implemented a data directory application using AngularJS with the Back-End team.

Cloud9ers – Front End and User Interface Engineer
(2014 – 2015)

Based in Cairo and Istanbul, I was working with the design team to implement designs into functional and responsive websites. Collaborated with the Back-End team and server side technologies like Rails/Express.

KickStartInteractive – Front End Developer
(2012 – 2014)

Responsible for Front End development, and CMS builds for small to medium sized companies.

Education

Bachelor of Accounting – Zagazig University - Egypt (2011)
