A Self-taught & Entrepreneurial Front End Developer based in Cairo - Egypt.

I believe the web should be open for everyone, so my main focus and passion is to create faster, functional, and accessible products to make an impact in peoples live.

Experience

Aspire Themes — Founder & Developer (2015 - Present)

At Aspire Themes I design and develop hight quality WordPress, Ghost and Jekyll themes.

Trustious - Front End Developer (2015)

Worked with the engineering team in a data driven application and also designed and implemented a data directory application using Angular JS with the Back End team.

Cloud9ers - Front End and User Interface Engineer (2014 – 2015)

Based in Cairo and Istanbul, I was working with the design team to implement designs into functional and responsive websites. Collaborated with the Back End team and server side technologies like Rails/Express.

KickStartInteractive - Front End Developer (2012 – 2014)

Responsible for Front End development, and CMS builds for small to medium sized companies.

Personal Projects

oktob.io - Blogging platform for the Arabic world

I created it to solve a personal problem for not finding a simple and functional platform for writing in Arabic. Oktob helped thousands of people write and read in Arabic with a simple and elegant UI.

Skills

HTML5 - CSS3 - JavaScript - Sass - ITCSS - Handlebars - Responsive Design - Accessibility - Gulp - Deployment - Git - GitHub - Command Line - Writing.
